

FERRY STEPS

HINT FILE
SCROLL DOWN

Each letter can be translated to a number. A is 1 and Z is 26. Use that information to first find the values of the each of the letters written. Second you will need to either add, subtract, or multiply which will then give you the new final number then letter. W is 23 K is 11. $23-11=12$ 12 translates back to L which is the first letter.
