

Balloons and Numbers

This puzzle goes with the U1 DOOR:

The note on the door is giving you a hint that the image with multiple balloons is an alphabet cipher as there are 26 balloons. Each balloon has two numbers. The note also mentions subtracting is key. Subtract the second number from the first and you will have a specific number for that letter the balloon corresponds to. The balloons are A to Z.

This will help you decode the password needed for this door.
