

COLOR CHART/CABOODLE

SCROLL DOWN FOR HINT

The caboodle has a sticker with colored disks. The color chart is missing numbers on the colored circles. You are going to have to find the missing colors and complete the equations to get the right tones that match the disk sticker.

We also know the number for red which is 8 and purple is 32. Red and blue make purple so blue must be.. 24

Now you should be able to find the value for yellow.

Next you will use that information to solve the brighter colors that match the sticker on the caboodle. To get the 3 digit number follow the instructions above the color wheel.
