

# Ferris Wheel

## **Hint File** **Scroll Down**

There are both letters and numbers on the Ferris wheel cabins. One cabin has A 24

Using your cipher wheel turn the numbers so A matches up with 24. Now you can decode message.

If you are not using a cipher wheel simply write out you alphabet a to z.

Starting under a with the number 24 continue the numbers. **\*When you get to c 26 you will need to start with the number 1 under d (as there are 26 letters in alphabet.)**
